About INDIAN INSTITUTE OF TEACHER EDUCATION, Gandhinagar

INDIAN INSTITUTE OF TEACHER EDUCATION, Gandhinagar is an initiative of Government of Gujarat as one of the steps for marching towards excellence in education. It is established by an act passed in Legislature Assembly Gujarat in 2010. **Hon'ble Chief Minister Shri NarendraModi** has envisioned this University for the development of teacher education in general and education as a whole. It is his wish to make it a centre of excellence in teacher education.

For enriching goals and visions, **Hon'ble First Vice Chancellor Dr. Kamlesh Joshi** invites you to participate and to deliberate on following themes and subthemes in understanding how teacher education has been passing through transition.

Theme of the Seminar: "Teacher Education through Transition"

It is observed from almost all of the reports of Commissions appointed in area of education that each have emphasised need of strengthening teacher training and/or education for development in quality of education. As a part of such measures NCTE has been setup for monitoring and establishing norms for all such programmes in which courses related to teacher education are involved. From 1993, there are numbers of initiatives introduced and they are amended time by time. In other words, teacher education is passing through transition; still it needs to be thought in terms of how better it can be.

This is an effort to look into this area specifically in following domains:

1 **NCFTE-2009 and Curriculum**

NCTE has published NCFTE as measures and guideline for framing curricula in teacher education. There are different courses, ranging from ECCE to B.Ed. and M.Ed. as well as integrated course in teacher education. The papers are invited looking into teacher education programmes through NCFTE-2009.

2 **Diversified and innovative role of teacher educators in contemporary teacher education programme**

Day-by-day, the teacher education needs to be very focused programme because schools are getting edge of modern as well as scientific notions coming out of innovation in education. Schools are becoming global and international standards are being observed in the schools. How these can be interwoven in the contemporary curricula is the concern of teacher education; so teacher educators need to be different in their temperament and knowledge. Let us think about innovative role of teacher educators for the development of teachers.

3 **Expectations of schools looking at emerging trends in education**

Schools are getting better and better edge, the teacher education programme must keep pace with all these changes so that they can be incorporated in teacher education programme.

4 **Need of revising teacher education programmes with global perspective.**

Let's think globally and work locally, think of such teacher education programmes that include wider perspective and global vision for incorporating them into updated teacher education programme.

5 **NME-ICT in Teacher Education**

It is an initiative of Government of making use of ICT in education. Let us think about NME-ICT in teacher education.
