Security Deposit:

Rs. 5000 (Rs. Five Thousands Only) (to be deducted from the bill.)

SCOPE OF WORK

NAU has recently constructed buildings for Clinical Complex for animals on Dandi road. This Complex is meant to treat the sick animals catering for the surrounding area and if necessary, to do operation and surgery on these animals. The Architects for this building were 'tectonics' of Navsari. The roof of the OPD area of this complex has been designed as a circular dome of 30 m dia and 7.5 m height in the center. The sides of the circular area are almost open upto about 2m height. It appears that due to the excessive height in the centre or for any other reason the sound rebounds from the surface of the dome, resulting into loud echoes.

Scientists dealing with sick animals believe that the animals cannot tolerate echo in a room. Sick animals get scared, become restless and get agitated mentally when confronted with echo. In such a condition it is not possible to treat them or perform surgery for their illness, in this room. As a result, this area is not being used for the purpose for which it is constructed and is lying vacant.

A full-proof solution is to be arrived at. The Acoustic-Consultant should analyse the problem, design the solution with guaranty and work out the cost of the remedial measure. For this Acoustic Consultant has to suggest a solution such that it will not mar the very architectural form and should be an assured one.

The Acoustic-Consultant must visit the building and should collect the details of the problems from the veterinary scientists of NAU and the final solution desired by them. The details of the officers concerned are as under.

1. Dr. N.H.Kelavala, Dean, Veterinary 98254 26268
2. Dr.J.N. Mistry, Head, Surgery 94268 98277
3. Shri H.T.Bhalsod - Executive Engineer 99740 63093
4. Shri M.V.Gadhavi – DEE 94283 81735

Acoustic-Consultant will submit the Report in the following format:

1. Brief description of the Consultant / Company giving details such as number of years of standing, and the expertise in the field of acoustic etc.
2. Detailed out-line of the problem and the remedial measures suggested.
3. Brief description showing as to how the remedial measures suggested will be successful.
4. In what manner Consultant / Company will guarantee the solution.
5. Approximate period required for implementing the solution.
6. The Consultant / Company should work out an item wise cost estimate based on SOR of the District / rate analyses, for which they can take help of DEE NAU.
7. On demand by the Consultant, drawing of the area supplied by the Architects in the office of Executive Engineer, NAU, Navsari attached here with.
8. Consultant will fill up the enclosed annexes duly signed.
9. Report will have to be submitted within 15 days of, the work order.

In case Consultant opts for carrying out the work on turn-key basis including the civil work they are welcome to do so for which separate quotation will be invited from such willing Consultants.
