Grand Education Fair- 2017

"A way towards enlightenment"

About US:

"We strive to provide a value for your educational needs"

"Your dreams, Our Mission"

Grand Education Fair organized by Education Department, Govt. of Gujarat provides an ideal platform to students aspiring for higher studies and aims to promote collaborative excellence between academicians and other professionals from institutions.

Decision on getting admission in a college or programme can be quite tricky for both students and their parents. Due to peer pressure, students end up taking wrong decisions in their careers and get into an uninteresting environment of studies. This situation is undesirable. Government is aware and concerned about this issue and has taken various innovative steps to tackle the situation.

Each of our experts provide a high standard and friendly counseling, because we realize that applying to Institutions can seem challenging. We firmly believe that students require a friendly expert and experienced Institution to assist with the process of applying for the right course of their choice.

The choices are immense, the opportunities abound, but each student and his/her goals, ambition, academic achievement, financial parameters are different. This merits serious thinking in a lateral framework and we understand this.

Why Education Fair?

" Education-Life-Progress "

An education fair educates and gives vast information for the career to the students achieving their dreams. Its gives a brief idea for the different choices of streams and the study area to the students visiting the fair. To achieve the students' dreams and the interested working area the student must attend this fair where they can understand and pursue their dreams with the help of different scholarship programs and taking admission to the choice of college or university.
