:: Future Plan

Emphasize has been given to create interest in the UG students to pursue PG in Agril. Statistics and increase intake capacity of PG students in Agril. Statistics. Also, the use of advanced statistical software SAS 9.3 has been started for data analysis. Training courses on Advanced Statistical Tools would be started in near future. All agricultural statistics courses offered by the department at both under graduate and post-graduate level, course lecture note and exercise, assignments will be put on website and accessible from the NET. All circulars and documentation regarding the education, research and extension activities will be available online.
