Being a tremulous and hopeful hunter in the job jungle; the fresh passing out students may feel totally inadequate to showcase their professional capabilities in the written form (CV / Resume), which will create their image in the mind of the interviewer even before they walk in for the interview. So, they need to write an effective resume / c. v. / bio-data. And ironically, for most of them, this might become a night mare!!! Even after getting an interview call from the prospective employer, they may feel unprepared and nervous, as it is always difficult for a job seeker, to face the interviewer, *especially for freshers who are just out of college*, seeking a job. **Most people do badly at job interviews not because they are incompetent; but simply because they are just plain nervous.** On the day of interview, sweating palms and stomach butterflies are to be expected. But, good news is that writing an effective resume & giving interview is a skill, and just like any other skill, it too can be developed. One can reduce the stress level by knowing some common mistakes that candidates make in preparing their CV as well as while meeting with potential employers and avoiding them.
