8. You will get the following window from there click on "Add" button for adding Gujarati Language Keyboard.

9. You will get a window titled as "Add Input Language" like below: select "Gujarati" from "Input Language" Then From "Keyboard layout/IME" select your customized Gujarati Keyboard Like "Gujarati Indic IME" or any other which you have already installed. You will find the selected keyboard layout in the list.

(If you don't have any customized keyboard for Gujarati, you can use "Gujarati" given by Microsoft, but before using that keyboard, you need to know which Gujarati alphabets are mapped to which key of keyboard. For that you can use "Office XP/2000 Add-in: Microsoft Visual Keyboard", which is free for downloading from Microsoft's web site.) (You can select more than one layout one by one...if you wish)
